COMPACT YET VERSATILE

The CAMSS35EX32.5 is a great choice as a portable shelter dedicated for meetings and briefings. With the volume of floor space available, as well as an open and well-lit interior, this shelter has proven to be more than suitable in numerous applications. The CAMSS35EX32.5 is currently in use in Europe as NATO's Combined Joint Task Force Headquarters, but this system has also been very popular when utilized for conference rooms, recreation centers, classrooms, and command centers. Measuring out to 35 feet wide by 32.5 feet long and 15 feet high, this shelter features ample room to fit any purpose that requires a wide open area.

RISING TO THE CHALLENGE

Highly engineered and proven on the field, the CAMSS35EX32.5 can easily withstand a combined 20 pound snow load and 70mph wind load. When utilizing our High Wind Kit, the shelter performs in even more extreme conditions and is rated to handle a 20-pound snow load with a brutal 100mph wind load.

Available for commercial as well as military users

FULLY EQUIPPED

Everything you need to assemble and maintain the CAMSS35EX32.5 is provided with this system and it can be erected in less than two hours by a trained crew of six personnel. As a complete system, this shelter comes standard with lighting, outlets, a power distribution panel, HVAC ports, one hard personnel door, two windows in each end, a spares and repair kit, and assembly tools. The included Extreme Weather Kit allows operation in temperatures ranging from -55 to 125 degrees Fahrenheit, while the airsock and plenum assist in the even distribution of cooler or warmer air as necessary. Additional doors or vehicle doors are optional add-ons, as are easily-installable hard floor panels. Connector boots can be made available as well, which allow complexing with other CAMSS Shelters, TEMPER Tents, and standard military tents.
