# RAPID SETUP

## CAMSS 14TAC SHELTER SYSTEMS

CAMSS 14TAC15

CAMSS 14TAC25

CAMSS 14TAC32

When it comes to the US Military, CAMSS Shelters understand speed is essential to any mission. That's why the CAMSS TAC Series of rapid deployment shelters are compact, lightweight, energy efficient, and fast to set up. The CAMSS TAC series shelters have one-piece frames and one-piece covers, which allow the shelters to erect in three (3) to five (5) minutes. Tested extensively by the US Army and independent labs, the CAMSS TAC series shelters are built for demanding missions in harsh wind, rain, and snow. The CAMSS TAC Shelter Systems are more rugged lightweight and compact than any other shelters in their class.

# LIGHTER. FASTER. BETTER.

CAMSS Shelters products are also available through the Defense Logistics Agency (DLA) and the General Services Administration (GSA) for military and US Government Agency users.

Watch the CAMSS 20TAC Video (Similar to 14TAC): <https://youtu.be/ORdf-bcwfMo>

CAMSS 14TAC shelters include standard options such as internal liner system, fabric floor with vector proofing, air sock with spot cooling, blackout windows, and HVAC ports. Double zipper entrances that include boots for connecting options such as vestibules, side to side connectors, end to end connectors, and side to end connectors. The connecting boots make it easy to complex TAC shelters together to form many different layouts.

## THE 14TAC SYSTEM —

Lightweight aluminum frame and separate fabric bundle allow for man liftable transport. Frame and fabric bundle are compact for shipping. The CAMSS14TAC-TRI is even more compact version in cases where every inch counts.
