Lighter. Faster. Better.

When it comes to the US Military, CAMSS Shelters understand speed is essential to any mission. That's why the CAMSS TAC Series of rapid deployment shelters are compact, lightweight, energy efficient, and fast to set up. The CAMSS TAC series shelters have folding frames and one-piece covers, which allow the shelters to erect quickly.

The CAMSS 24TAC LME shelter perfectly fits the need for a Lightweight Maintenance Enclosure (LME) of which several organizations are buying. The shelter is great for quickly providing cover and concealment to large equipment and medium sized vehicles. The CAMSS 24TAC LME is often used as a mobile maintenance facility to ensure a that maintenance is not being disrupted by weather.
