A JOINT EFFORT

The CAMSS20EX24 was developed in close cooperation with US Army Natick Laboratories. With tried and true durability you can always rely on, the CAMSS20EX24 Expeditionary Single-Pallet Kitchen (ESPEK) Shelter System is engineered to match the field proven high standard of quality that the CAMSS Kitchen Shelter System (KSS) boasts, while being quicker to assemble and faster to deploy. The 20EX24 is 20' wide by 24' long by 10.5' high with 7' straight sidewalls and an emphasis on portability. The shelter is designed to require a minimum of only two personnel to erect, but may be assembled by four personnel in under 30 minutes.

A ROBUST KITCHEN

The ESPEK system is designed for use throughout the world and makes the most efficient use of integrating 480 square feet of shelter possible for your requirements. When used expressly as an ESPEK, it provides room for kitchen, food preparation, sanitation, storage, service line areas, and furnishings with necessary electrical, piping, and ventilation pass-through.

Featured is a new, larger 3" aluminum tube that provides added strength and durability to the frame system. The stretch formed arches are 3" deep and are engineered to face higher wind and snow loads. The end base of the shelter incorporates our patented pully cover tensioning system, and the frame may be anchored using double headed spikes or concrete anchors for maximum stability.

PROTECTED FROM THE ELEMENTS

The CAMSS20EX24 cover is manufactured from 44103D Mil-Spec Fabric (available in tan or green) with blackout and infrared protection. Both the covers and end panels are supported by a weather-tight double overlap system including rain flaps at the base to direct water away from the shelter. Additionally, thanks to the tensioning system in place, the structure is better protected from elemental wear and tear while also dampening noise caused by wind. As part of a complete system, the CAMSS20EX24 ESPEK also includes our Extreme Temperature Kit. This kit maintains internal working condition temperatures in a multitude of climates, providing either a cooler workspace in hotter environments, or a warmer workspace in colder zones.

QUOTES & ORDERING

Available on GSA Contract and DLA
GSA Contract No. 47QSWA21D0004
