COMPACT & EFFICIENT

The CAMSS20EX8 Containerized Deployment Kitchen (CDK) Shelter is designed for immediate worldwide deployment and measures 20' wide by 8' long and 7' tall at the eaves. Weighing in at under 400 pounds, the CDK Shelter is designed with maximum portability in mind while remaining a complete system that is quick to assemble. The CDK is the first kitchen to hit the front lines until more extensive facilities can be established, and as such it is engineered to be set up by two personnel in less than 20 minutes without sacrificing the high quality standards that we set for our entire product line.

READY FOR DUTY

Once in the process of set up, the CDK Shelter easily attaches to the end of a CDK by utilizing existing Velcro straps. The opening in the shelter wall fits around the serving line window and personnel door on the CDK endwall, while a rain flap attaches the shelter wall to the roof of the CDK to create a weatherproof connection. The shelter is ruggedized with high-strength aluminum and Mil-Spec fabric, guaranteeing to protect serving line operations through harsh and variable weather conditions. The CAMSS20EX8 has been engineered and rigorously tested to support a 20-pound snow load and withstand a 100 mph wind load.

NUMEROUS FEATURES

The CDK Shelter is equipped with two windows in the endwall to fully allow for natural lighting. Three double zippered doors are included (one in the endwall, and one on each side of the shelter) to make the CAMSS20EX8 as accessible as possible. The Extreme Weather Kit and High Wind Kit come standard with this model, and the well-fitted cover assists in controlling the internal environment from extremes of -25 to 125 degrees Fahrenheit with a full solar load. Optional add-on items include CAMSS Corridors (for interconnection with other shelters), hard personnel doors, and an electric kit with lights and outlets.
