## WHEN YOU NEED A LARGE WORKING AREA WITH BIG DOORS

The CAMSS60EX5014 Shelter System is in use throughout Afghanistan and Iraq for large vehicle maintenance shelters. The CAMSS60EX5014 is compact to ship (463L pallet compatible), fast to erect (does not require heavy equipment), and provides a large working area with two electric vertical lift vehicle doors measuring 30' wide by 15' high. The all aluminum frame resists corrosion, reduces shipping weight and makes assembly faster and easier.

## INTEGRATED SHELTER SYSTEM

The CAMSS60EX5014 Shelter System measures 60' wide by 50' long with two (2) electric 40' wide by 14' high vertical lift truss doors and includes extreme temperature liner kit with plenums, HVAC ports, metal halide lighting, robust distribution panel with 20 Amp, 30 Amp and 60 Amp receptacles, aluminum personnel doors, anchoring kit, high wind kit and technical manual. An additional 50' length may be ordered to increase the shelter length to 100' long.

## COMPACT FOR RAPID DEPLOYMENT

The entire CAMSS60EX5014 Shelter System, including shelter, vehicle doors, personnel doors, extreme temperature liner, plenums, lighting, electrical kit, anchors and high wind kit, fit in 463L compatible CAMSS Crates with exception of ladders and lifts. Making for a compact shipment easy to transport.

## QUICK SLIP FIT AND LIFT ASSEMBLY

The CAMSS60EX5014 Shelter assembles in sections that slip fit and bolt together. All arches assemble together beginning with the peak. After the peak and ridges have been assembled together, mechanical lifts (included with tool kit) are used to make short lifts to attach eaves and uprights. This slip fit and lift assembly design allows the CAMSS60EX5014 to be assembled without the use of heavy equipment by a crew of six in sixteen hours.

## ELECTRIC LIFT TRUSS VEHICLE DOORS (30' Wide x 15' High)

The CAMSS60EX5014 Shelter System comes equipped with two (2) electric lift vehicle doors providing large 30' wide by 15' high access on each end of the shelter. The vehicle doors lift up vertically to not interfere with interior or exterior space. As well, the vertical lift doors do not leave any interior area exposed to the sky or weather as with baby buggy style doors, and open and close much more quickly. Aluminum box truss beams make for a robust frame on such a large door.

## HEAVY DUTY FLOORING AND ECUs

The CAMSS60EX5014 is available with heavy duty plastic flooring. Flooring can support large vehicles and equipment. Flooring fits on 463L pallets and snaps together in place as flooring. The CAMSS 5-Ton Environmental Control Units are compatible with the CAMSS60EX5014 HVAC ports and can plug into the 60 Amp receptacles provided with the distribution panel.

## QUOTES & ORDERING

Available for both commercial and military use.  
Available on GSA Contract and DLA  
GSA Contract No. 47QSWA21D0004
