

CAMSS CORRECTIONAL SOLUTIONS

• TRIED AND TRUE •

CAMSS Shelters has over 25 years of history working with Department of Correction agencies throughout the United States. Our professional engineered shelters and accessories are in use as dorms, offices, dining, lavatories and larger shelters for recreation, visitor centers and classrooms in harsh and demanding environments in locations throughout New Jersey, Washington state, Nevada, Arizona and Hawaii.

Available accessories include flooring, insulating liners, lighting, packaged HVAC, air cleansers with positive or negative air pressure, and plug and play electrical distribution.

Important Features

- Professionally engineered
- Durable with long life
- Portable
- Fast and easy to assemble
- Modular design
- Integrated accessories available

Dorms

Complete dorms with accessories can be set up in just a few hours ready to go.

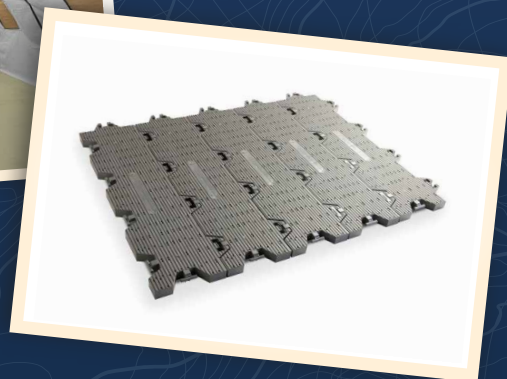

Dorms may be open, partially partitioned, or with individual rooms.

Shelters are available with easy to clean fabric flooring that includes hook and loop vector proofing along sidewalls. As well, composite hard flooring is available to go under the fabric floor to provide a hard stable surface for beds and other furniture. Alternately, shelters may be anchored to concrete or asphalt.

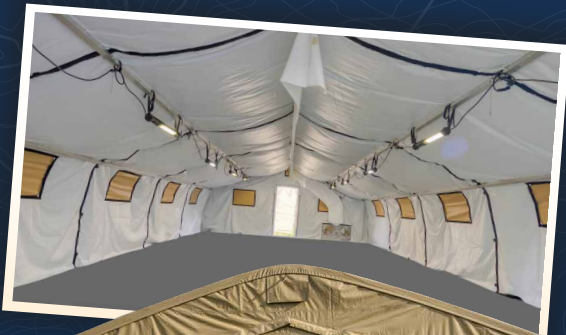

Interior liners easily install to provide insulating capability and are optional as pictured.

Ruggedized LED tube lights connect to the interior of the shelter frame. These lights use only 5 watts of power each and include a polycarbonate sleeve to make them especially durable. A more simple lighting solution is also available with light strings and protective baskets.

Packaged HVAC unit with thermostat provides on demand heating and cooling. Utilizing shelter HVAC ports and plenum to distribute conditioned air throughout the shelter.

Air cleansers with positive or negative air flow can provide enhanced fresh air changes and purified air.

Though CAMSS has many shelters to choose to meet your specific needs, below are some typical shelters for dorms.

CAMSS 24EX40-CT

CAMSS 21Q42-CT

CAMSS 24Q48-CT

CAMSS 20Q

CAMSS 20EX32

Shelters may be connected end to end or add vestibules and corridors with optional accessories to create a larger complexed facility.

Electrical Distribution

Plug and play electrical distribution allows you to power up your shelters from your local electrical sources or generator. CAMSS also provides generators with optional skid mount or trailered.

Offices

CAMSS offers shelters suitable for office space which are also available with accessories such as flooring, liners, lighting and outlets, HVAC, air cleanser with positive or negative air flow, and electrical distribution.

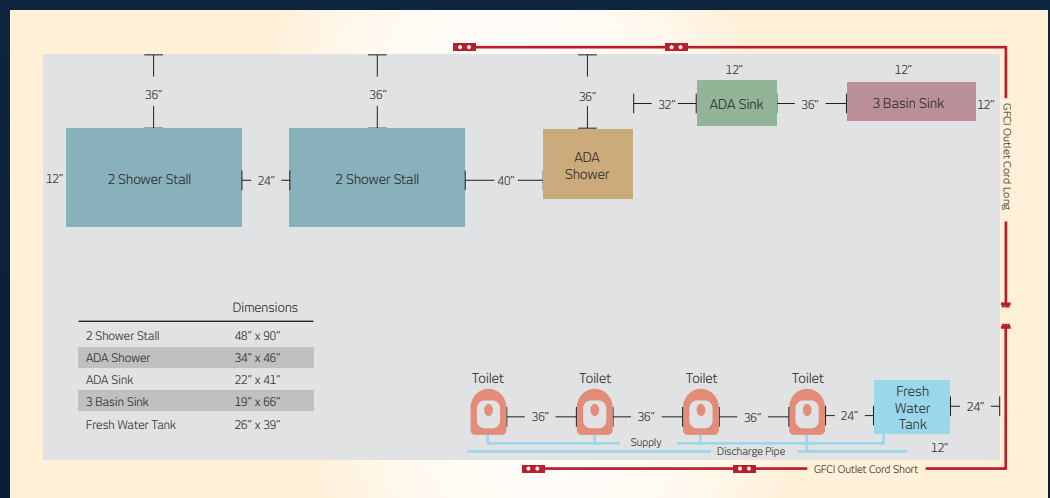

Dining

Dining facilities are available with the same accessories as dorms and offices.

CAMSS 20EX32, CAMSS 20EX40 and CAMSS 24EX40-CT shelters are good choices for dining facilities.

Lavatories

Lavatories may include toilets, sinks, and showers with pressurized hot water as well as the usual optional accessories such as hard flooring, liners, lighting and outlets, HVAC, air cleanser and electrical distribution.

Example of Shower/Latrine Layout

Sinks are compact for shipment and are pre-plumbed for quick installation. Optional ADA compliant sink is also available.

Toilets are flush type with maceration to reduce chance of clogs. Tank included to provide water to the system. Optional grey water bladder is available should a sewer inlet not be proximate.

Showers set up quickly and typically include pump with GFI that sits outside shower basin to pump away grey water. Where site conditions allow, gravity outflow elevated showers are available.
